Full-Stack .NET Developer · RESTful API & Backend Engineering · AI-Augmented Development

ABOUT ME

Full-stack .NET developer with almost 2 years of production experience building scalable backend services, RESTful APIs, and ERP modules. Proficient in C#, ASP.NET MVC, and SQL-based data systems with hands-on exposure to Redis, RabbitMQ, and cloud deployments. Actively augmenting development workflows with Generative AI tools – including prompt engineering, Google AI Suite, and vibe coding – to accelerate delivery and improve code quality. Comfortable owning end-to-end features in fast-paced product teams.

EDUCATION

B.Tech – Computer Engineering
2021-2024 (CGPA: 8.15 / 10)
G.H. Rasoni College of Engineering
& Management

Relevant Coursework

Data Structures & Algorithms, Object-Oriented Programming, DBMS, Machine Learning, Web Development

CORE TECHNICAL SKILLS

Languages: C#, JavaScript (ES6+), Java, SQL

Frameworks & Libraries: ASP.NET MVC, .NET Web API, Next.js, Vite.js, SignalR

Databases: SQL Server, MySQL, PostgreSQL, Firebase Firestore, Supabase, Redis Cache

Cloud & DevOps: AWS EC2, RabbitMQ, Splunk, Git, GitHub, Android Studio

Reporting & Integrations: RDLC / SSRS PDF Reporting, PayPal/Stripe API, Gmail OAuth 2.0 SSO, JWT Auth

Concepts: OOP, MVC Architecture, RESTful API Design, Asynchronous Programming, Role-Based Access Control (RBAC)

GENERATIVE AI STACK

Tools & Platforms: Google AI Suite, Anthropic Claude, Amazon Q

Practices: Prompt Engineering, Vibe Coding, Workflow Automation with AI Agents

PROFESSIONAL WORK EXPERIENCE

Jul 2025 - Present

Software Developer

Pune

JMP EDUTECH PVT. LTD.

- Architected and delivered core modules for **ProEduERP** – student admissions, exam management, and RBAC login – using **ASP.NET MVC**, reducing manual admin effort by streamlining end-to-end enrollment workflows.
- Engineered **RESTful APIs** to bridge the web platform with a mobile application, enabling **real-time data sync** and supporting over 5 integrated modules.
- Built automated PDF reporting using **RDLC**, replacing manual report generation and cutting turnaround time for HR and payroll documents.
- Developed an **Excel-upload task manager** and **automated notification system**, reducing data entry overhead and improving operational visibility for administrators.
- Designed role-specific interactive dashboards for admins, teachers, and students featuring clickable **Chart.js** visualizations and paginated data tables.
- Improved application performance by refactoring synchronous code to **async/await** patterns and migrating legacy templates to current framework versions.
- Leveraged AI-assisted development (**Amazon Q, Gemini**) to accelerate feature prototyping and generate boilerplate, reducing implementation time on new modules.

PROFESSIONAL EXPERIENCE CONT.

Sep 2024 - Feb 2025

Junior Software Developer
Pune

● **ICODEX PUBLISHING SOLUTIONS LTD**

- Built scalable backend services and RESTful APIs in **C# / .NET WebAPI**, handling document workflows for a **multi-tenant publishing platform**.
- Integrated **PayPal** and **Stripe** payment gateways with **webhook-based event handling**, enabling secure end-to-end transaction processing.
- Implemented **Gmail OAuth 2.0 SSO** for frictionless user onboarding, reducing signup drop-off and centralising identity management.
- Optimised API response times by introducing **Redis Cache** for high-frequency queries and **RabbitMQ** for **asynchronous message** queuing, improving throughput under load.
- Set up Splunk logging and alerting pipelines, providing centralised observability and reducing mean time to detect (MTTD) production issues.

Jun 2023 - Dec 2023

Project Coordinator Intern
Pune

● **ICODEX PUBLISHING SOLUTIONS LTD**

- Authored **Software Requirements Specifications (SRS)** and **Technical Design Documents (TDD)** for 7 concurrent projects, aligning development with business requirements.
- Conducted comprehensive **API testing** (input validation, status codes, file upload/download flows) and documented findings to support QA cycles.
- Engineered real-time document co-editing features using **SignalR WebSockets**, enabling simultaneous multi-author collaboration on manuscript drafts.

PROJECTS

● **Search Online Business Directory** | Next.js (TypeScript), Node.js, PostgreSQL, Tailwind CSS

- Built an SEO-optimised business directory app using Next.js with **Server-Side Rendering (SSR)** and **Context API**, enabling dynamic search and category filtering.
- Designed a normalised **PostgreSQL schema** and secured all API routes with **JWT authentication** and role-based access, ensuring data integrity at scale.

● **School Scheme Analytics Dashboard** | Vite.js, Firebase Firestore, Chart.js, Tailwind CSS

- Developed a **real-time analytics dashboard** to monitor government scheme school visits, with CSV data ingestion, live **Firestore** sync, and interactive **Chart.js** visualisations.
- Delivered a **data-driven reporting interface** that reduced manual tracking effort and improved scheme visibility for stakeholders.

CERTIFICATIONS & ACHIEVEMENTS

- Data Structures and Algorithms — Coursera
- Introduction to Internet of Things (IoT) — NPTEL
- Codement Hackathon — Built an ML-based crop recommendation system using supervised learning models.
